Attention: Nigel Robinson, Project Officer

Re: Millington, Great Swamp,
White Bridge Road and
New Vernon Road Sites.

Dear Mr. Robinson:

In response to EPA's comments, please find enclosed two copies of the revised edition of the "Draft Site Operations Plan" for the Millington, Great Swamp, White Bridge Road and New Vernon Road Sites. To expedite your review, I have attached a summary of our responses in the same order as your comments, and the corresponding page(s) on which they are addressed.

Pursuant to our discussions with you and Mr. Ray Basso on November 1, 1985, and your discussions with the NJDEP, we have made the following change, with the approval of EPA and NJDEP, in the scope of work delineated in Appendix I of the Consent Order: all borings will be advanced with eight-inch inside diameter hollow stem augers.

November 18, 1985

Due to safety and access considerations, we recommend that work be started during the winter months. With this in mind, we would appreciate your approval of this plan by January 15th, 1985. Should you have any questions regarding our responses, please feel free to contact Ms. Frances Barker or myself at (212) 840-3990.

Sincerely,

FRED C. HART ASSOCIATES, INC.
